

Figure 1: Gender Wage Gap and FTFY Participation Time Series using the CPS-No Graph Edits

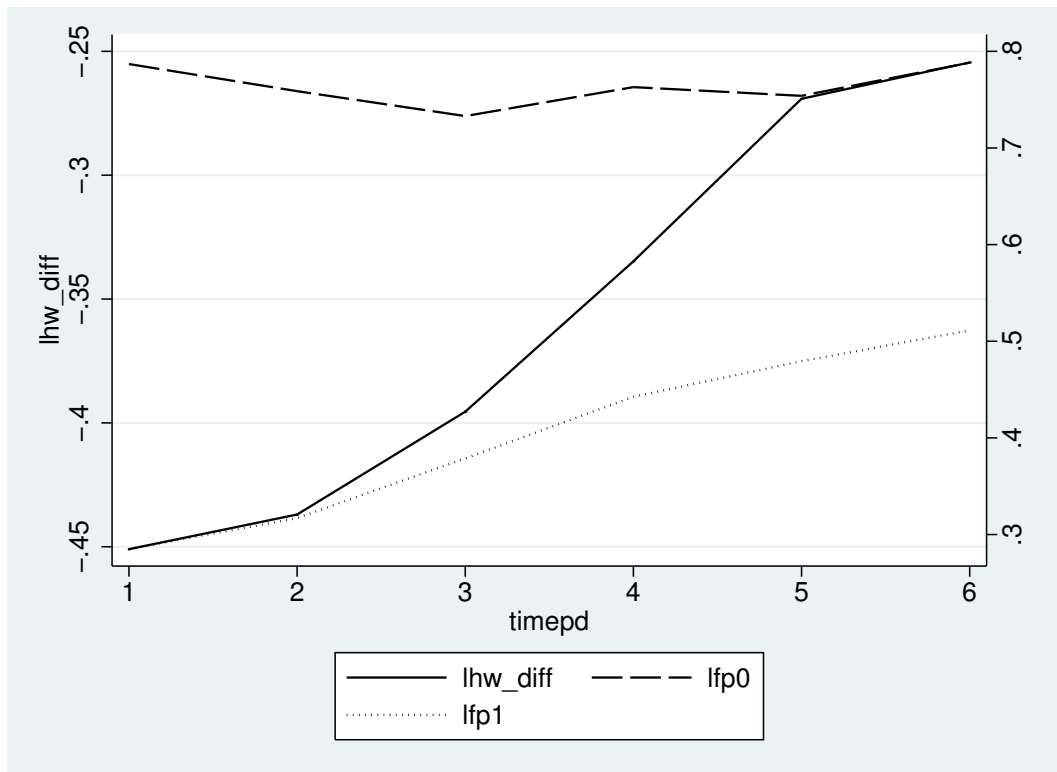

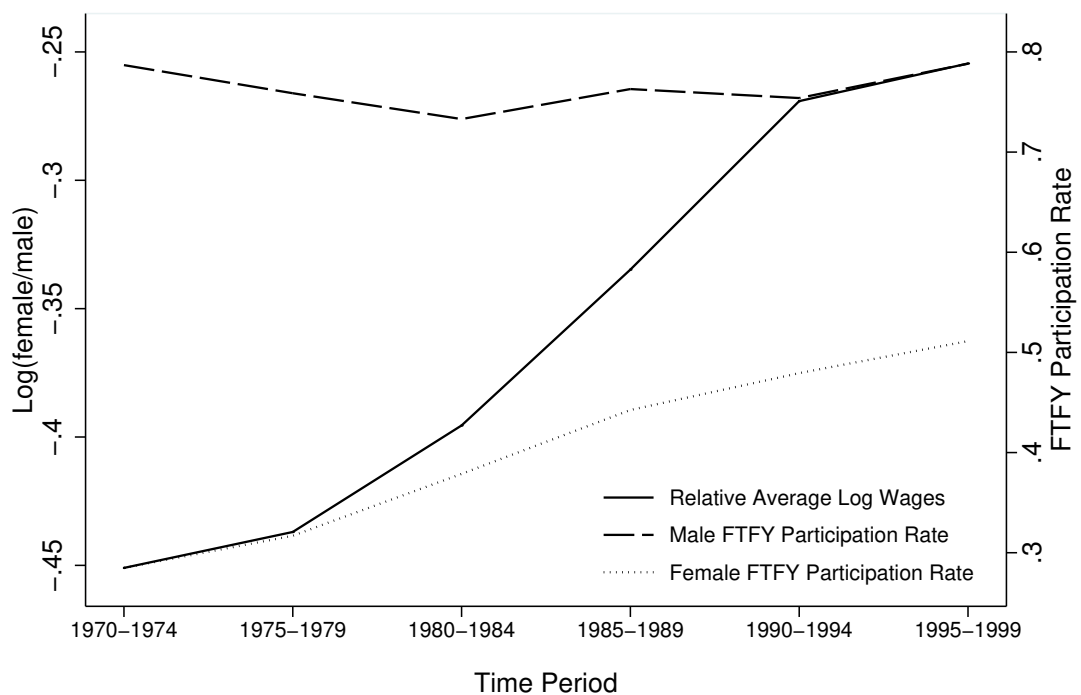

Figure 2: Gender Wage Gap and FTFY Participation Time Series using the CPS

Using the CPS, this figure compares how the average log hourly wage of women relative to the log hourly wage of men have changed over time. It also displays a time series of the male and female full-time full-year labor force participation rates. The sample consists of white, non-Hispanic individuals aged 26 to 55 (at the time of the survey) not living in group quarters. Each time period is created by grouping 5 consecutive years of CPS March Surveys.
